Department of Information Technology (B.Sc.I.T Semester V)
(Dot) .Net Core and Progressive Web Application

Practical – II

Roll No.:T054	Name:Priti Yadav
Class:TYIT	Batch:2
Date of Assignment:27/06/26	Date/Time of Submission: 09/07/26

2. Write the program with different features of C#

a)Function Overloading

CODE:-

```
using System;
public class HelloWorld
{
    void Fun1(int num1,int num2)
    {
        Console.WriteLine("addition of 2 number is:"+(num1+num2));
    }
    void Fun1(int num1,int num2,int num3)
    {
        Console.WriteLine("addition of 3 number is:"+(num1+num2+num3));
    }
    public static void Main(string[] args)
    {
        HelloWorld obj=new HelloWorld();
        obj.Fun1(11,11);
        obj.Fun1(11,12,13);
        Console.WriteLine("Priti Yadav T054");
    }
}
```

OUTPUT:-

```
addition of 2 number is:22
addition of 3 number is:36
Priti Yadav T054
```

```
=== Code Execution Successful ===
```

b) Inheritance (all types)

Single Inheritance

CODE:-

```
using System;
public class A
{
    public
    void Fun1()
    {
        Console.WriteLine("Method of Class A"); }
}
```

```

    }
    public class B:A
    {
        public
        void Fun2()
        {
            Console.WriteLine("Method of Class B"); }
    }
    public class main1
    {
        public static void Main(string[] args)
        {
            B obj=new B();
            obj.Fun1();
            obj.Fun2();
            Console.WriteLine("Priti Yadav T054");
        }
    }
}

```

OUTPUT:-

```

Method of Class A
Method of Class B
Priti Yadav T054

```

```

=== Code Execution Successful ===

```

Multilevel Inheritance

CODE:-

```

using System;
public class A
{
    public
    void Fun1()
    {
        Console.WriteLine("Method of Class A"); }
}
public class B:A
{
    public
    void Fun2()
    {
        Console.WriteLine("Method of Class B"); }
}
public class C:B
{
    public
    void Fun3()
    {
        Console.WriteLine("Method of Class C");
    }
}
public class main1
{

```

```

public static void Main(string[] args)
{
    C obj=new C();
    obj.Fun1();
    obj.Fun2();
    obj.Fun3();
    Console.WriteLine("Priti Yadav T054");
}
}

```

OUTPUT:-

```

Method of Class A
Method of Class B
Method of Class C
Priti Yadav T054

```

=== Code Execution Successful ===

Multiple Inheritance

CODE:-

```

using System;
public interface A
{
    void Fun1();
}
public interface B
{
    void Fun2();
}
public class C : A, B
{
    public void Fun1()
    {
        Console.WriteLine("Method from A"); }
    public void Fun2()
    {
        Console.WriteLine("Method from B"); }
}
public class main1
{
    public static void Main(string[] args)
    {
        C obj = new C();
        obj.Fun1();
        obj.Fun2();
        Console.WriteLine("Priti Yadav T054");
    } }

```

OUTPUT:-

```

Method from A
Method from B
Priti Yadav T054

```

=== Code Execution Successful ===

Hierarchical Inheritance

CODE:-

```
using System;
public class A
{
    public
    void Fun1()
    {
        Console.WriteLine("Method of Class A"); }
}
public class B:A
{
    public
    void Fun2()
    {
        Console.WriteLine("Method of Class B"); }
}
public class C:A
{
    public
    void Fun3()
    {
        Console.WriteLine("Method of Class C"); }
}
public class main1
{
    public static void Main(string[] args)
    {
        B obj=new B();
        obj.Fun1();
        obj.Fun2();
        C obj1=new C();
        obj1.Fun1();
        obj1.Fun3();
        Console.WriteLine("Priti Yadav T054");
    }
}
```

OUTPUT:-

```
Method of Class A
Method of Class B
Method of Class A
Method of Class C
Priti Yadav T054

=== Code Execution Successful ===
```

c) Constructor overloading

CODE:-

```
using System;
public class abc
{
    abc(int num1,int num2)
    {
```

```

Console.WriteLine("addition of 2 number is:"+(num1+num2)); }
abc(int num1,int num2,int num3)
{
Console.WriteLine("addition of 3 number is:"+(num1+num2+num3)); }
public static void Main(string[] args)
{
abc obj = new abc(11,11);
abc obj1= new abc(11,12,13);
Console.WriteLine("Priti Yadav T054");
}
}

```

OUTPUT:-

```

addition of 2 number is:22
addition of 3 number is:36
Priti Yadav T054

```

=== Code Execution Successful ===

d) Interfaces

CODE:-

```

using System;
interface IStudent
{
void display();
}
class Student : IStudent
{
public void display()
{
Console.WriteLine("Name: Pritii");
Console.WriteLine("Roll No: T054");
}}
class Program
{
public static void Main(string[] args)
{
Student obj = new Student();
obj.display();
Console.WriteLine("Priti Yadav T054");
}}

```

OUTPUT:-

```

Name: Pritii
Roll No: T054
Priti Yadav T054

```

=== Code Execution Successful ===

e) Using Delegates and events

CODE:-

```

using System;
public delegate void Demo();
class Program

```

```
{  
public static void Show()  
{  
Console.WriteLine("Hello from Delegate");  
}  
static void Main(string[] args)  
{  
Demo d = Show;  
d();  
Console.WriteLine("Priti Yadav T054");  
}  
}
```

OUTPUT:-

```
Hello from Delegate  
Priti Yadav T054
```

=== Code Execution Successful ===

f) Exception handling

CODE:-

```
using System;  
class Program  
{  
static void Main(string[] args)  
{  
try  
{  
int a = 10;  
int b = 0;  
Console.WriteLine(a / b);  
}  
catch  
{  
Console.WriteLine("Divide by zero error");  
Console.WriteLine("Priti Yadav T054");  
} } }  
}
```

OUTPUT:-

```
Divide by zero error  
Priti Yadav T054
```

=== Code Execution Successful ===
